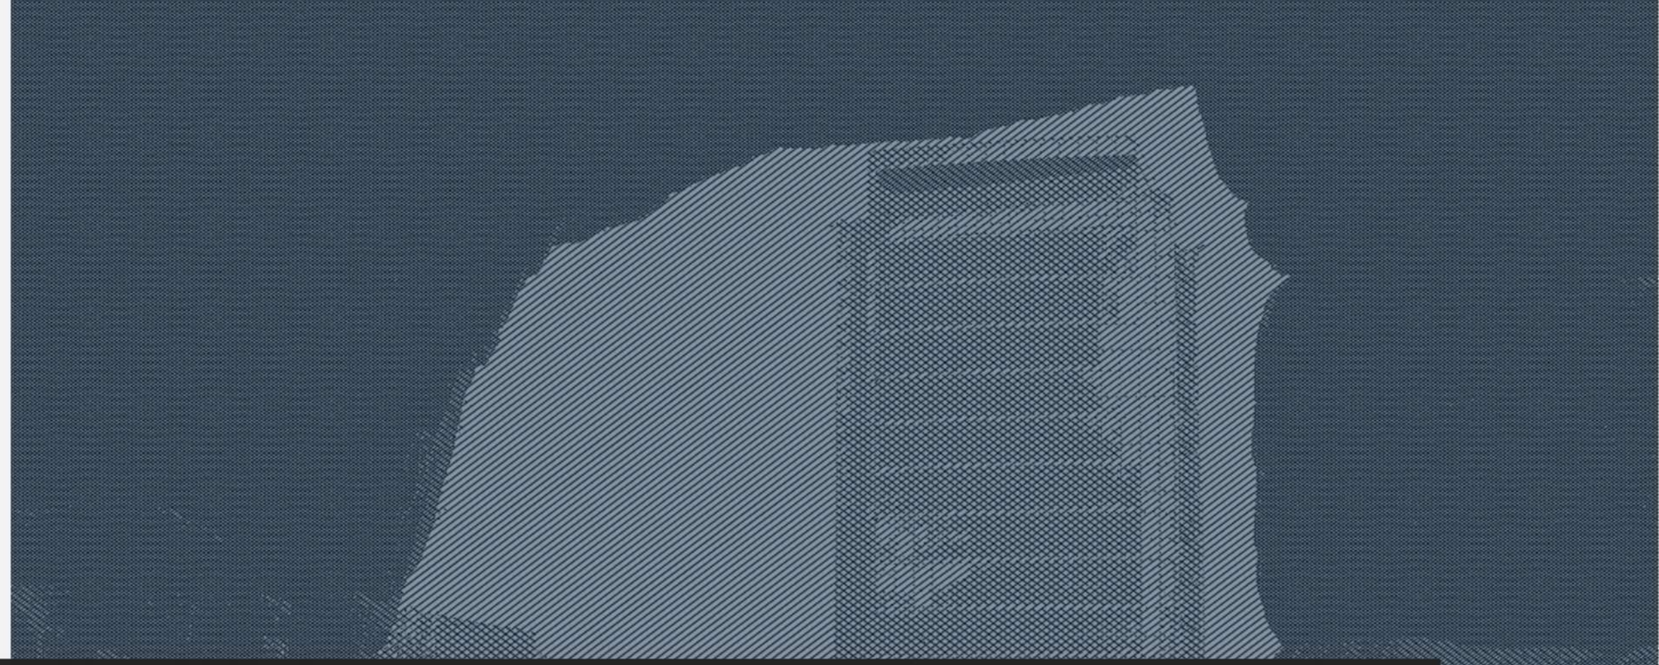
TAIBA CONSULTING COMPANY
شركة طيبة للاستشارات

COMPANY PROFILE

ABOUT US

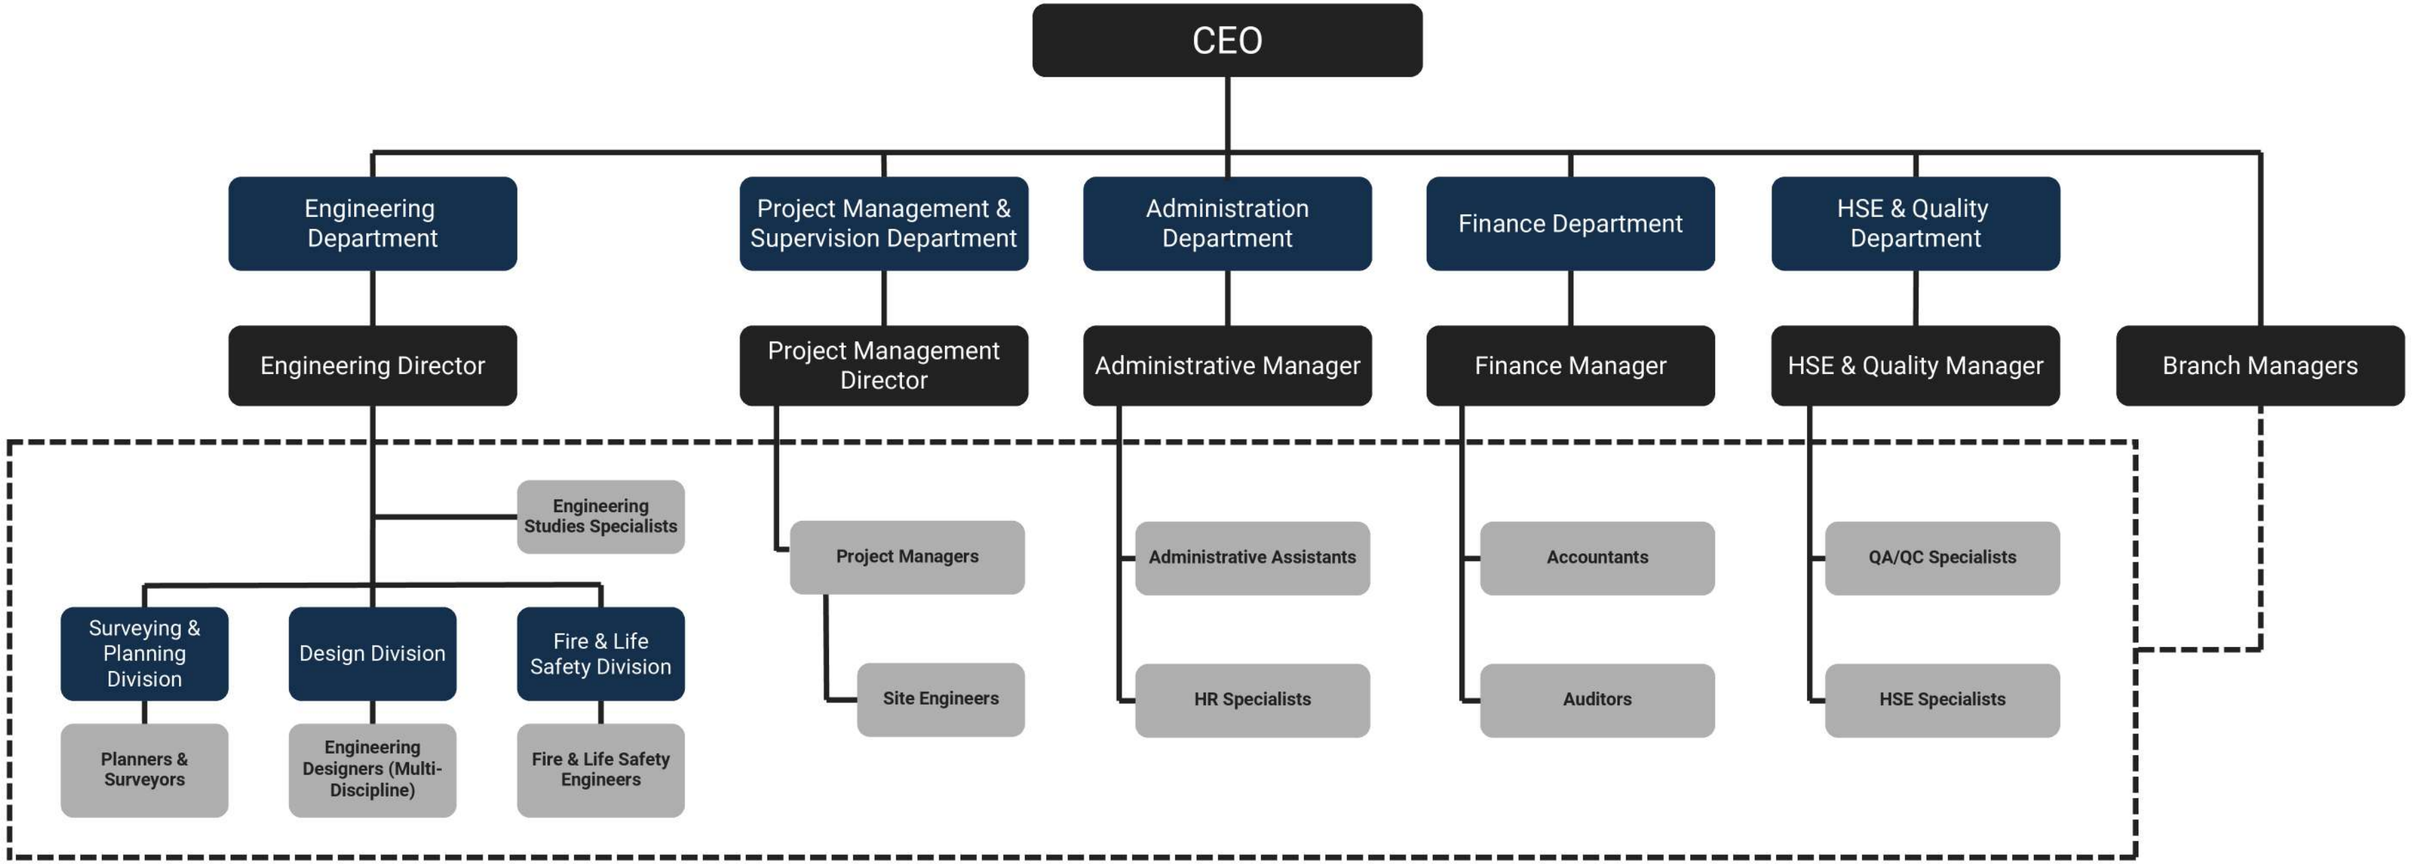


Taiba Consulting Company (TCC) is a leading engineering consulting firm based in Saudi Arabia. Established in 1981, TCC offers a comprehensive range of multidisciplinary engineering services. Our expertise includes but not limited to design, supervision, project management, and surveying, all executed with precision and adherence to the highest industry standards. TCC is committed to providing innovative and reliable solutions to meet the evolving needs of our clients.

Mission & Vision

- Permanent continuity of aspiration and ambition to provide an integrated and innovative architectural product.
- Providing creative and sophisticated solutions and ideas.
- Accuracy and honesty at work.
- The constant pursuit of excellence and development of technical staff by seeking beneficial partnerships and recruiting distinguished expertise.

ORGANIZATIONAL CHART



SUPERVISION

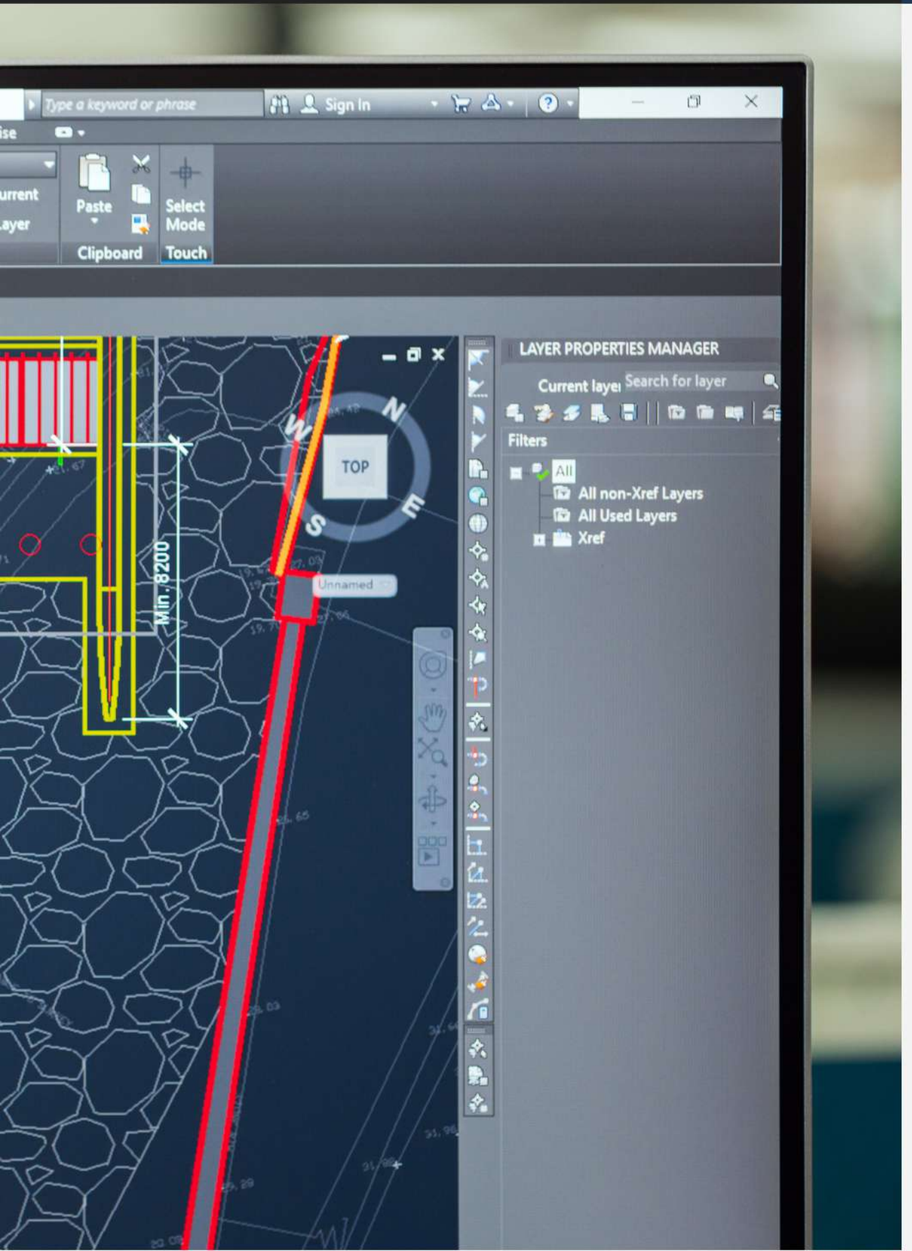
At TCC, we work closely with our clients, and project contractors to ensure that project objectives are met efficiently and effectively. Our collaborative approach fosters transparent communication and quick resolution of challenges, facilitating a smoother construction process and alignment with client goals.

Construction
Construction supervision is one of our core services, refined over years of hands-on experience and dedication to excellence. Our expert team ensures each phase of construction aligns with design specifications, quality standards, and safety regulations, preserving the integrity of every project.

Fire and Life Safety Systems
We also specialize in overseeing fire and life safety system installations, rigorously implementing protocols to guarantee compliance with the highest safety standards and protect occupants and assets.

Infrastructure
Our supervision expertise also extends to infrastructure projects, prioritizing long-term durability and resilience to foster sustainable community growth. With a deep understanding of industry best practices, we bring invaluable expertise to every project, making our supervision services a key strength of our company.

OUR SERVICES



ENGINEERING DESIGN

TCC offers a comprehensive suite of engineering design services, leveraging industry-leading CAD and other software to deliver precise, high-quality designs across multiple disciplines.

Civil & Structural Engineering
Our team provides structural designs that are code-compliant and tailored to meet each project's unique demands, Using advanced engineering analysis and software.

Electrical Engineering
Our electrical engineering solutions deliver robust electrical systems that ensure optimal power distribution, safety, and energy efficiency.

Architectural Design
Our architectural designs combine aesthetic appeal with functionality, creating inspiring and practical buildings and spaces.

Mechanical Engineering
In mechanical engineering, we provide integrated designs for HVAC, plumbing, and essential building functions, ensuring comfort and sustainability.

Additional Services
Additionally, we provide other design services, such as infrastructure, fire and life safety, and other support design services as needed

Permitting Support
We provide assistance with building permits and fire/safety approvals to streamline timelines and ensure regulatory compliance.

INTERIOR DESIGN

TCC provides comprehensive interior design services that blend creativity, functionality, and aesthetics to deliver spaces that inspire and perform.

Concept Development & Mood Boards
We create design concepts and mood boards that communicate style, color palettes, materials, and spatial ideas, providing clients with a clear vision from the outset.

3D Visualizations & Renderings
High-quality 3D renderings and visualizations allow clients to experience the design before implementation, ensuring clarity and alignment with project goals.

Space Planning & Layout
We optimize layouts for flow, comfort, and functionality, ensuring efficient and visually appealing spaces.

Material & Finish Selection
We guide the choice of materials, finishes, and furnishings to balance durability, quality, and design intent.

Custom Solutions & Implementation Support
Tailored designs are coordinated with contractors and engineers to ensure accurate execution while maintaining design quality and client objectives.

OUR SERVICES

SURVEYING

At TCC, we provide precise and reliable surveying services, utilizing advanced surveying equipment to support a variety of engineering and construction projects. Our surveying services ensure accuracy and precision, supporting planning, design, and compliance with industry standards.

Land Boundary Surveying
Land boundary surveying establishes clear and accurate property lines, crucial for property ownership and development projects. Using total station or GNSS survey equipment, our team measures and marks boundaries, resolving property line disputes and providing accurate documentation for legal and planning purposes.

Topographic Surveying
mapping the elevation and natural features of the land to provide a detailed, three-dimensional view of the area. This service supports site planning and design, giving project teams the essential data they need to adapt to the land’s natural contours.

Drone Photogrammetry
With our drone photogrammetry services, we capture high-resolution aerial images to create accurate, up-to-date maps and 3D models. This technology allows us to survey large and hard to reach areas efficiently, providing valuable data for land assessment, infrastructure planning, and progress monitoring.

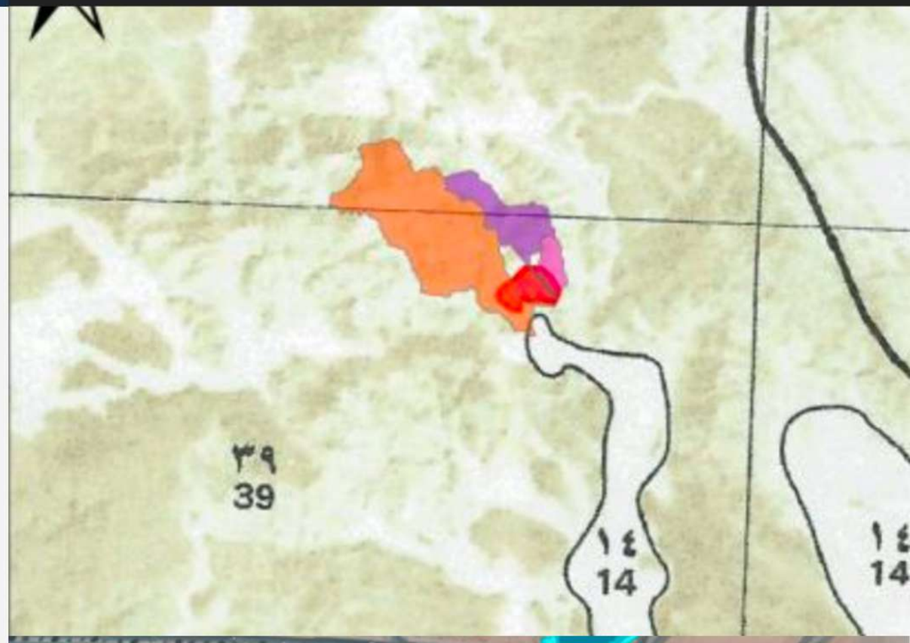
ENGINEERING STUDIES

Our engineering studies provide essential insights into site conditions, supporting informed decision-making for design and construction. We offer a range of studies to help projects succeed in diverse environments.

Hydrology Studies
Our hydrology studies focus on analyzing rainfall patterns and conducting hydraulic modeling, particularly in relation to flood-prone areas and natural drainage channels like wadis. We assess water flow dynamics and provide recommendations for managing runoff and mitigating flood risks, ensuring that projects are prepared for seasonal rainfall events.

Geotechnical Studies
In collaboration with our trusted partners, we conduct geotechnical studies to assess soil properties, stability, and load-bearing capacity. These studies inform foundation planning and help identify potential ground-related challenges, enhancing the safety and durability of structures.

Environmental Studies
Our environmental studies, conducted with expert partners, evaluate potential ecological impacts, air and water quality, and regulatory compliance needs. These assessments provide recommendations that support sustainable practices and ensure alignment with environmental standards, safeguarding natural ecosystems.



OUR CLIENTS

Public Sector

Over the years, TCC has had the privilege of working with some of the most prominent clients in the public sector, delivering exceptional services tailored to their unique needs. These valued partnerships reflect the trust we've built through our commitment to quality and excellence.

OUR CLIENTS

Private Sector

TCC has partnered with a wide range of clients in the private sector, delivering tailored solutions that meet their unique needs. While we've worked with numerous organizations, the clients showcased here represent some of the most prominent names who have trusted us with their key projects. These partnerships reflect our dedication to quality, and long-term success.

OUR COMMITMENTS

OCCUPATIONAL HEALTH AND SAFETY

TCC is committed to preventing personal harm, protecting property, and safeguarding all individuals who interact with our company or project sites. We take all reasonable measures to eliminate foreseeable work-related risks and maintain a safe working environment.

Our Commitments

- We provide and maintain safe, healthy working conditions in full compliance with legal requirements.
- We ensure personnel receive the training and guidance needed to work safely and effectively.
- We supply and supervise the use of appropriate safety devices and protective equipment.
- We promote active engagement in health and safety matters, with management leading by example.

Our Safety Approach

Safety is a core pillar of our operations. As an **ISO 45001:2018 certified** company, we follow internationally recognized occupational health and safety practices to minimize risks for our team, clients, and stakeholders. Through careful planning, regulatory compliance, and continuous improvement, TCC prioritizes safe working environments across all projects and services.

QUALITY

At TCC, we are committed to establishing the right people, processes, and resources to deliver professional, high-quality services that meet client needs. We understand that maintaining strong quality practices reinforces client trust and supports successful project outcomes.

Our Commitment to Quality

- We respond promptly and appropriately to client inquiries and requirements.
- We pursue continuous improvement in the quality, efficiency, and reliability of our services.
- We ensure employees receive the training necessary to satisfy company and client needs.
- We work to meet and when possible, exceed client expectations.
- We regularly update our policies to remain aligned with international best practices.

Quality Management System

Our quality policy is implemented through a structured Quality Management System aligned with **ISO 9001:2015**. This system uses cost-effective, planned, and systematic procedures to define, monitor, and achieve quality while meeting client expectations and industry standards.

THE ENVIRONMENT

At TCC, we are committed to protecting the environment by implementing responsible practices that minimize the impact of our operations. Environmental stewardship is integral to our projects, ensuring sustainable outcomes for clients, communities, and stakeholders.

Our Commitments

- We strive to reduce waste, conserve resources, and prevent pollution across all projects.
- We integrate sustainable practices into project planning, design, and execution.
- We continuously review and improve our environmental practices to meet evolving standards.
- We promote awareness and responsibility among our team, clients, and partners to support environmental sustainability.

Our Safety Approach

Our environmental policy is applied through a structured **ISO 14001:2015 certified** Environmental Management System. This framework enables us to plan, monitor, and control environmental impacts, ensuring compliance with regulations and promoting sustainability.
